CAREER GOALS

Versatile professional with a strong foundation in visual effects, motion design, and diverse technical skills, seeking opportunities across machine learning, programming, and various tech fields. Passionate about applying my broad expertise to innovative projects, I bring adaptability and a commitment to rapid skill acquisition. My experience spans from software development to hardware repair and system maintenance, allowing me to approach challenges from multiple angles. Always eager to learn and master new technologies, I aim to contribute effectively to any tech-related task, even those outside my current skillset. Seeking a dynamic role where I can leverage my varied abilities, continuously expand my knowledge, and make a significant impact in the ever-evolving tech industry.

GITHUB PROJECTS

POK Ark Survival Ascended Server Management Script
https://github.com/Acekorneya/Ark-Survival-Ascended-Server

- POK-manager.sh is a powerful and user-friendly script for managing Ark Survival Ascended Server instances using Docker. It simplifies the process of creating, starting, stopping, updating, and performing various operations on server instances, making it easy for both beginners and experienced users to manage their servers effectively.
